Baltimore & Ohio
Class EM-1
2-8-8-4 “Yellowstone” [HO]

Delivery to be announced

As with so many other late-built steamers, Baltimore and Ohio's Class EM-1 2-8-8-4 came about thanks to World War Two. As with other roads, the war put increased traffic burden on existing equipment. More road power was needed. Although diesels were desired, the War Production Board limited the numbers of diesels available. Modern steam was the answer. The B&O had success with with earlier articulateds in heavy drag service, and other roads had success with simpled articulateds in high speed freight service. Thus, the B&O Engineering Department felt that simple 2-8-8-4s would provide heavy hauling at higher speed. It was a darned good guess!

Though designed for the west end grades of the Cumberland division, wartime saw the 7600s anywhere in the division, pulling nearly anything the war effort required - coal drag, fast freight or passenger service. This versitility continued through the end of steam operations (and beyond - #651 and #659 serving to deliver steam at a chemical plant into 1960). In spite of their short life, many steam fans consider the EM-1s the best-looking articulateds ever built.

The first 20 (nos. 7600-7619) were constructed in 1944, with 10 more (nos. 7620-7629) built in 1945. As with other "war babies", the EM-1s had a short service life, all being retired by 1957. Renumbered the year before their retirement, we will ignore the re-numbering and concentrate on the "7600s" in the mid-1950s. The Division Point and Boo-Rim Precision will produce a limited quantity of these husky beauties, so best contact your dealer NOW!

As usual, we are indebted to those folks who publish the information and photos we need. We urge you to buy their books and photos.
- Baltimore & Ohio's Magnificent 2-8-8-2 EM-1 Articulated Locomotive by Thomas W. Dixon & Bob Withers (2007, TLC Publishing)
- B&O Steam Finale Volume II by Deane Mellander & Bob Kaplan (1988, National Railway Historical Society)

Also, thanks to the Baltimore & Ohio Railroad Historical Society for preserving the data!
