HO SCALE

Canadian Pacific Railway Class D-10h,k 4-6-0 Ten-wheeler

The Canadian Pacific acquired many 4-6-0 Ten-wheelers over the years, particularly in 1912-1913. Erection of the D-10h,j,k subclasses was spread between Montreal Locomotive Works (MLW), Canadian Locomotive Co. (CLC) and the Alco Schenectady Works. Most of the D-10s were equipped with a standard 12-ton/5,000-gal tender, although there were exceptions. Though most of the D-10s were fueled by coal, out west some were oil-fired.

The *Division Point* and *Boo-Rim* will offer this LIMITED EDITION project in different numbers and a wide variety of these small work horses. With only 200 pieces to be produced, you are well advised to contact your dealer to reserve yours!
