

Central Vermont Railway Classes M-2a, M-3a, N-5a 2-8-0 Consolidations [HO]

HO SCALE

"Consols" . . . they were the life blood of the Central Vermont. With their wheel loading, they could run anywhere on the system! Passenger service, freight service, locals or mainline, the CV's 2-8-0s did it all. These locos were well suited to their service(s) and location!

We've been wanting to do Consolidations for a long time now, but the costs worked against us. We've now negotiated a cost which will result in a decent retail price. The Division Point and Boo-Rim will offer this LIMITED EDITION project all numbers of the class. With only 150 pieces to be produced, you are advised to contact your dealer to reserve yours!

As usual, we are indebted to those folks who publish the information and photos we need. We urge you to buy their books and photos.

Central Vermont In Color by George F. Melvin & Jeremy F. Plant (2000, Morning Sun Books, Scotch Plains, NJ)

The Central Vermont Railway - A Yankee Tradition, Volume V The War Years and Dieselization, 1941-1960 by Robert C. Jones (1982, Sundance Publications, Silverton, CO)

Also, thanks to the societies, fans and photographers who have preserved the data for the rest of us!
