

D&RGW/SP Krause-Maffei ML4000 Diesel-Hydraulics

HO SCALE

BRUTE STRENGTH! That's what both the Rio Grande and the Southern Pacific were looking for in the early 1960s. The GRande and the SP found it in Europe in form of the Krauss-Maffei ML4000. The 4,000-hp ML4000 was powered by high-revving Maybach diesel engines, driving one axle in each truck through torque-converter hydraulic transmissions. All axles on the truck were geared together, in theory reducing wheel slippage. In practice, the Grande found too much slippage for their mountain grades, and sold their units to the SP.

Road testing in Bavaria

Early testing in South Boulder Canyon

As usual, the Division Point will offer a limited number of these interesting units. Expect the usual smooth running and attention to detail. Also offered will be the Rio Grande's dynamometer car #10, which kept regular company with the K-Ms.

D&RGW #4001 as-delivered at Burnham

D&RWG #10 Dynamometer Car

SP #9001

ORDER FORM

Customer Name: _____
 Address: _____ State: _____ ZIP: _____
 Phone: _____ Fax: _____ E-mail: _____

Item	Description	Quantity
DP-5207	D&RGW (#4000-4003) in Grand gold, black/silver stripe, external air ducts	_____
DP-5201	D&RGW (#4000-4003) in Grand gold, black/silver stripe, internal air ducts	_____
