

Kansas City Southern Class J 2-10-4 Texas-type

HO SCALE

In the depths of the depression, the KCS came to a realization that their stable of 2-8-0s and 2-8-8-0s could not compete in the "fast freight" business coming to fruition in the 1930s. An order was placed with Lima Locomotive Works, home of "Super Power", i.e. high-speed high-horsepower modern steam. This order resulted in the 1937 delivery of ten 2-10-4s, half oil-burners, half coal-burning. These were assigned class J, and numbered 900-909.

While limited by the relatively slow track structure of the KCS, these locomotives performed heroically until scrapped in 1952-1953. The Division Point and Boo-Rim will offer this LIMITED EDITION project all numbers of the class. With only 100 pieces to be produced, you are advised to contact your dealer to reserve yours!

- As usual, we are indebted to those folks who publish the information and photos we need. We urge you to buy their books and photos.
