

U.S.R.A. 2-8-2-A "Light" Mikados

HO SCALE

As you probably know, we have been planning to bring you the Nickel Plate "H" series Mikados for quite some time now. After doing some checking, we have decided to make this an actual "series" of engines that will be completed over the course of several model runs.

It's well known that we at the Division Point have a penchant for MIKES. (After all, we have done five types already!!) These were truly the "general purpose" engines of the steam era . . . in many cases outlasting their much larger and more powerful brothers and sisters until the very end of steam operations.

To accompany the Nickel Plate "H"s, the *Division Point* and *Boo-Rim* will catalogue the following U.S.R.A. light Mikados.

ORDER FORM

Customer Name: _____
 Address: _____ City: _____ State: _____ ZIP: _____
 Phone: _____ Fax: _____ E-mail: _____

Item	Description	Quantity
DP-8001	Baltimore & Ohio Class Q-3 [4500-4599] Light Mikado Baldwin-built	_____
