

# U.S.R.A. 2-8-2-B "Heavy" Mikados

**HO SCALE**

Having done a number of 2-8-2 projects, it is obvious that we at the *Division Point* love the MIKES. These were the "general purpose" engines of the steam era. This time we are focusing on the 233 engines built 1918-1920, which (with some mods) served through the end of steam. As before we'll concentrate on the "transition" era.

The *Division Point* and *Boo-Rim* will offer this LIMITED EDITION project in limited road numbers. With only 120 pieces to be produced, you are well advised to contact your dealer to reserve yours! Remember, it is YOUR reservations which will determine which of these husky Mikes we will produce!
