

D&RGW's #10 Dynamometer Car

Summer
2006

As we researched the Karus-Maffei project we discovered the Rio Grand's #10 Dynamometer car. Modified from a Pullman troop sleeper, #10 had bay windows, airconditioning, and a generator set added to support the dynamometer equipment

Though a constant companion to the Krause-Maffei locos, the Grand used #10 to test many other D&RGW diesels. A worthy addition to your model "Grande", we've decided to offer it as a "single".
